FinTech: Pine Script, MQL(C++), Pattern Recognition Algorithms, Trading Bots, FinTech Education Portals

DevOps: Git, Docker, CI/CD, Stripe

Work Experience

Founder — FinTech Educator — Full-Stack Developer

iTradeAIMS Ltd & BrumByte Ltd, Birmingham, UK

2011–Present

- Built and scaled iTradeAIMS, a digital trading education business featuring live indicators, automated bots, premium courseware, and an active user community.
- Developed “Banana EA” and 50+ Pine Script indicators with global reach, 1.2K+ followers, and real-time trading signal deployment.
- Authored “Trading Chaos: The AIMS Way” eBook; later transformed into a 3-phase video course with 1,000+ paid users.
- Published on Amazon “How to Count Elliott Waves” Book, supported with automated wave-counting scripts, video course and strategy dashboards.
- Delivered WordPress/WooCommerce sites (e.g., Bewdley Farm Shop, Splashbacks Birmingham), integrating SEO, Stripe, custom delivery tools.
- Led all product design, roadmap planning, user research, and iterative releases based on community feedback.

Top Products and Projects

- **ChartBridge (BrumByte.com):** Led the end-to-end development of a FinTech MVP bridging TradingView strategies with MT4/5 platforms. Conducted market analysis, competitor research, and stakeholder interviews to validate the opportunity. Formed and managed a cross-functional team of 3 engineers to deliver the MVP—launch scheduled for late 2025.

Technologies: Next.js, Supabase, PineConnector API, MT4/MT5 bridge, REST APIs

- **iTradeAIMS.net:** Designed and maintained a trading education platform with gated content, membership tiers, and integrated community tools. Drove user onboarding, payments, and content workflows for 1K+ traders via Discord and web-based learning.

Technologies: WordPress, Bricks, WooCommerce, Stripe, PayPal, Discord SDK

- **Banana EA (MQL4):** Developed and iterated a modular Expert Advisor automating forex trades using technical signals, ATR-based risk, and entry refinement logic. Released as a plug-and-play tool for MetaTrader 4 with community feedback loops.

Technologies: MQL4, MetaTrader, ATR logic, custom signal engine, debug framework

- **AIMS Algo:** Led product design and technical delivery of a PineScript-based trading algorithm. Integrated dynamic risk controls and MT4 execution via PineConnector. Managed roadmap, QA testing, and trader success—achieved +230% return over 12 months.

Technologies: Pine Script, TradingView, MT4, PineConnector, equity filters, slippage sim

- **The Elliott Wave Principle (Book):** Researched user pain points through community interviews and analytics. Authored and published a simplified Elliott Wave guide for beginners—paired with a custom indicator. Led content development, marketing, and user support.

Technologies: Amazon Kindle, Pine Script, TradingView, Canva, community testing

Education

- **BSc Computer Science (Level 4)** *University of London (Online)* *2024–Present*
